Statistics

Starting with release 7.1.0, Forms for Confluence now supports visualising Statistics of Responses. In order to access this functionality, go to the Forms Configuration:

As we can see there is now a View Statistics button. If we click this will open our statistics in a separate tab in our browser:

This provides a clear visualisation on our responses, and a much easier way to see in detail what were the majority of responses.
Statistics are only displayed for controls that have a limited amount of choices, such as: Dropdown List, Checkbox Group, Radio Button Group
